

# Community Health Centers

Community Health Centers are non-profit organizations providing health care to those with insurance and without. All sites offer primary care and many offer specialty care as well. There is no residency requirement; individuals can receive services at any facility of their choosing, with over 1,200 health centers in 8,000 rural and urban communities across the nation. Sliding-scale fees based on family size, income, and insurance status ensure that anyone who uses a Community Health Center can receive quality care regulated by federal standards.

The organizations listed below are state or regional associations that have access to a directory of local health centers in each state as well as Puerto Rico and can refer you to your local community health center. Please contact your local association or use [HRSA's Tool \(https://findahealthcenter.hrsa.gov/\)](https://findahealthcenter.hrsa.gov/) to find a community health center that meets your needs.
