

Spinal Muscular Atrophy

Spinal Muscular Atrophy (SMA) Types I, II, III and IIV belong to a group of hereditary diseases that cause weakness and wasting of the voluntary muscles in the arms and legs of infants and children. The disorders are caused by an abnormal or missing gene known as the survival motor neuron gene (SMN1), which is responsible for the production of a protein essential to motor neurons. Without this protein, lower motor neurons in the spinal cord degenerate and die.

The type of SMA (I, II, III or IV) is determined by the age of onset and the severity of symptoms. Type I (also known as Werdnig-Hoffman disease, or infantile-onset SMA) is evident at birth or within the first few months. Symptoms include floppy limbs and trunk, feeble movements of the arms and legs, swallowing difficulties, a weak sucking reflex, and impaired breathing. Type II (also known as juvenile SMA, intermediate SMA, or chronic SMA, has an onset between 6 and 18 months. Legs tend to be more impaired than arms. Children with Type II are usually able to sit without support if placed in position. Some may be able to stand or walk with help. Type III (also called Wolhlfart-Kugelberg-Welander disease, or mild SMA) can begin as early as the toddler years or as late as adolescence. Children can stand alone and walk but may have difficulty getting up from a sitting position. Type IV develops after age 21 and the individual has mild to moderate leg muscle weakness.

Websites

Cure SMA (formerly Families of SMA)

http://www.curesma.org/

50 East Commerce Dr., Suite 90

Schaumburg, IL 60173 Toll-free: 800-886-1762 E-mail: info@curesma.org

Cure SMA is dedicated to promoting and supporting research, helping families cope through informational programs and support, and educating the public and the medical community about SMA. The organization has 29 chapters serving all but 3 states. Offers

publications such as Understanding Spinal Muscular Atrophy, Breathing Basics, and Caring Choices.

Never Give Up/Gwendolyn Strong Foundation

https://nevergiveup.org/

27 W. Anapamu St., Suite 177 Santa Barbara, CA 93101 Phone: 805-203-0334

Email: info@nevergiveup.org

Gwendolyn Strong Foundation offers advocacy and assistance to families of SMA children and also continues to offer practical family support for the overwhelming expenses of life with a disability, helping give families greater independence. The Foundation is building an inclusive playground in Santa Barbara, CA.
