

Chiari Malformation

Chiari malformations (CMs) are structural defects in the cerebellum, the part of the brain that controls balance. When the indented bony space at the lower rear of the skull is smaller than normal, the cerebellum and brainstem can be pushed downward. The resulting pressure on the cerebellum can block the flow of cerebrospinal fluid (the liquid that surrounds and protects the brain and spinal cord) and can cause a range of symptoms including dizziness, muscle weakness, numbness, vision problems, headache, and problems with balance and coordination. There are three primary types of CM. The most common is Type I, which may not cause symptoms and is often found by accident during an examination for another condition. Type II (also called Arnold-Chiari malformation) is usually accompanied by a myelomeningocele—a form of spina bifida that occurs when the spinal canal and backbone do not close before birth, causing the spinal cord to protrude through an opening in the back. This can cause partial or complete paralysis below the spinal opening. Type III is the most serious form of CM and causes severe neurological defects. Other conditions sometimes associated with CM include hydrocephalus, syringomyelia, and spinal curvature.

Web Sites

American Association of Neurological Surgeons (AANS): Patient Information – Chiari Malformation

www.aans.org

<https://www.aans.org/patients/conditions-treatments/chiari-malformation/>

The AANS provides information on four types of chiari malformation, syringomyelia and hydromyelia, including symptoms, diagnosis and treatment.

American Syringomyelia & Chiari Alliance Project (ASAP)

<http://www.asap.org/>

PO Box 1586

Longview, TX 75606-1586

Phone: 903-236-7079, 800-ASAP-282 (Toll Free)

E-mail: info@asap.org

ASAP provides information regarding Chiari (CM) and syringomyelia (SM) and related disorders and support for people with these disorders and their families and caregivers. The organization also funds research and sponsors an annual medical conference.

Bobby Jones Chiari & Syringomyelia Foundation (CSF)
