

Community Health Centers

Community Health Centers are non-profit organizations providing health care to those with insurance and without. All sites offer primary care and many offer specialty care as well. There is no residency requirement; individuals can receive services at any facility of their choosing, with over 1,200 health centers in 8,000 rural and urban communities across the nation. Sliding-scale fees based on family size, income, and insurance status ensure that anyone who uses a Community Health Center can receive quality care regulated by federal standards.

The organizations listed below are state or regional associations that have access to a directory of local health centers in each state as well as Puerto Rico and can refer you to your local community health center. Please contact your local association or use HRSA's locator (<https://findahealthcenter.hrsa.gov/>) to find a community health center that meets your needs.
